

S4i
Warehouse
Package

The Package

Our Warehouse Package delivers a complete, ready-to-use system for intelligent warehouse lighting and network management. It integrates advanced hardware, intuitive software, and professional services into a single, streamlined package — engineered for efficiency, reliability, and long-term performance.

What's Included

Core System & Licensing
S4i IB Host License
Warehouse Dashboard with intuitive system control and monitoring

Lighting Control Hardware

S4i DALI Controllers (x4)
S4i-IB Host Edge Controller
S4i Casambi Gateway (supports up to 250 nodes)
S4i Industrial Network Switches & Power Supply Units
S4i 4G/5G Router

Software & Integration

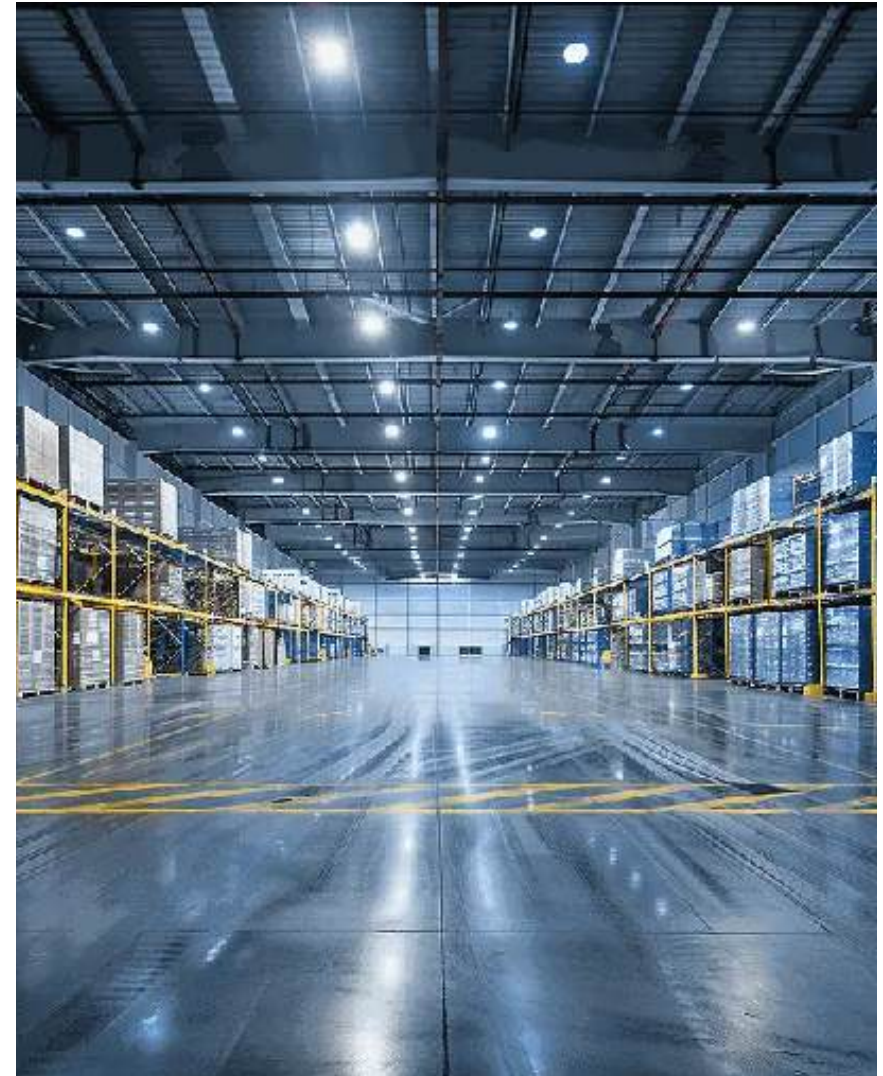

Secure remote access for system monitoring and management

Design & Commissioning Services

Full system design and product evaluation
As-built documentation and operation manual
On-site commissioning and system validation

Support & Warranty

3-year extended warranty, with optional extension
Remote system support as required

With the S4i Warehouse Control Package, you can:

Control, manage and automate warehouse lighting, with a dashboard interface.

Peace of Mind

Stay aligned with performance and compliance, backed by professional design, commissioning, warranty, and remote support.

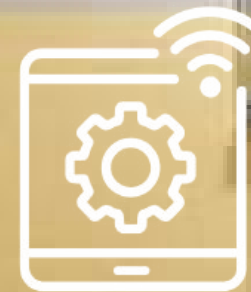

Energy Savings

Reduce operating costs with intelligent controls, and efficient scheduling

Seamless Control

Switch easily between on, off and specific scenes

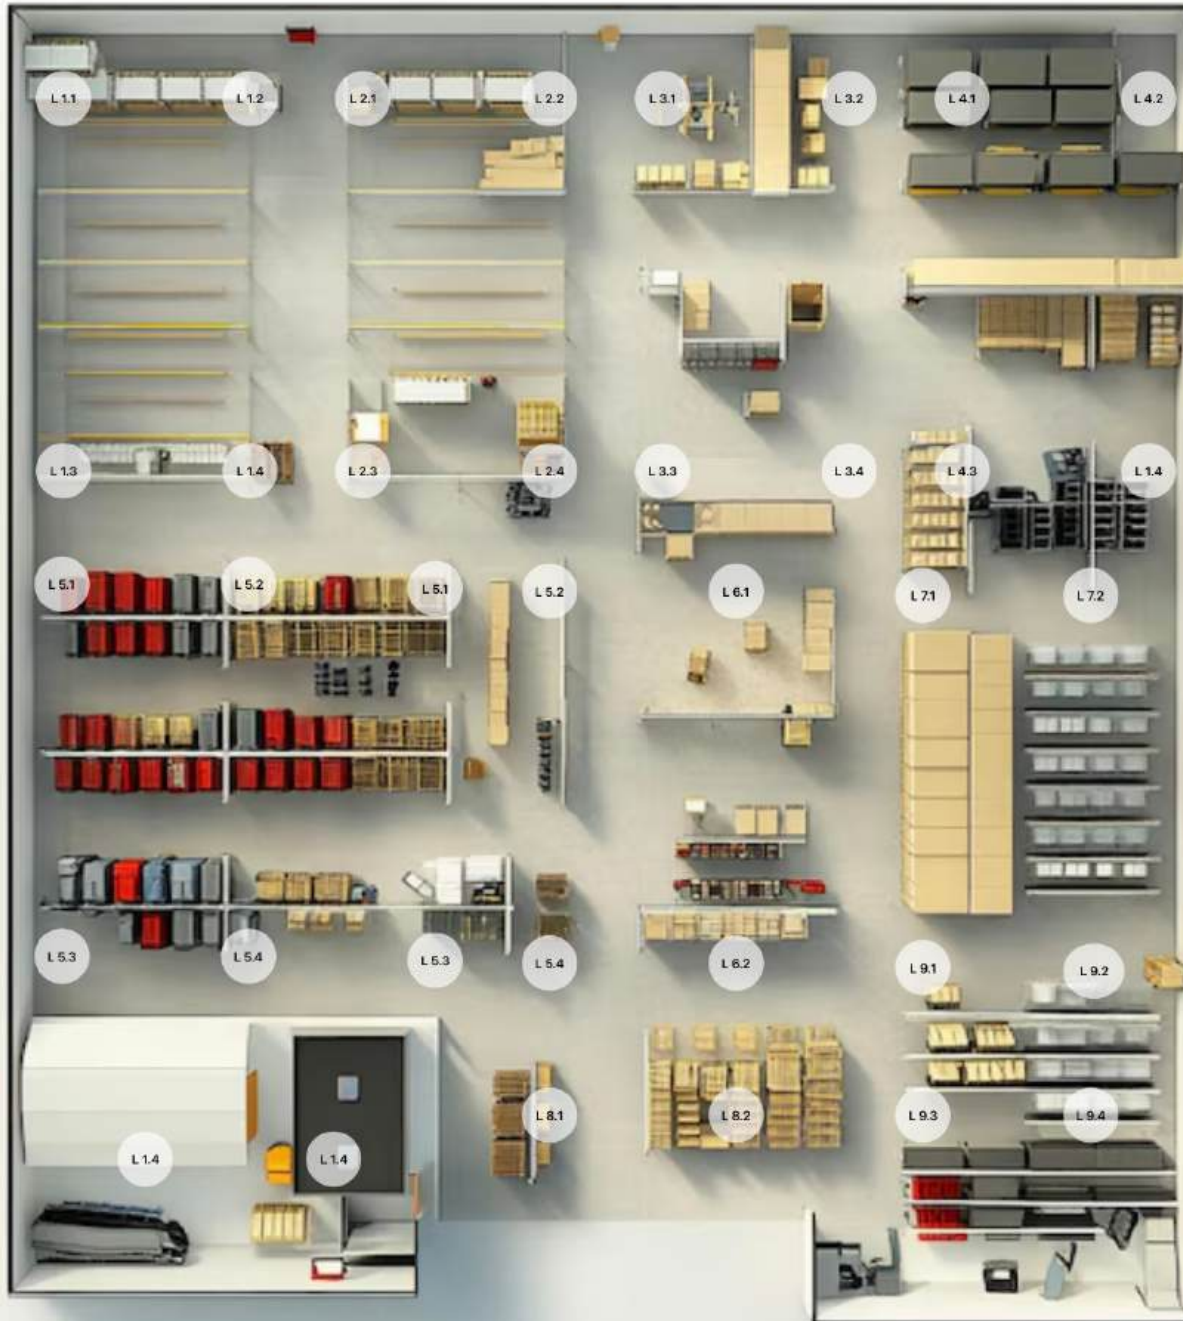

Easy to Use

Manage lighting through an intuitive dashboard, accessible on-site or remotely.

Future-Proof Flexible

Easily retrofit with wired DALI or wireless BLE Casambi, offering simple installation and adaptable hybrid technology.
